# Workshop: Verification and Regulatory Issues for Remote Robotic Inspection

work smarter, more safely and more efficiently

**Frank van Bockel**

---

# About Lloyd's Register

Who are we?

# About LR - at a glance

## Who we are

A global organisation with specific areas of focus around marine, energy, management systems and inspection services.

## History

Founded in 1760 as a marine classification society.

## Independent

Wholly owned by the Lloyd's Register Foundation, a UK charity dedicated to research and education in science and engineering.

- Mission to enhance safety of life & property, and advance public education
- Based in the UK but awards grants globally
- Impact and excellence are the major

# LR Foundation

## LRF - Foresight reviews

Lloyd's Register Foundation Life matters

### Roadmap for additive manufacturing

Safe adoption of additive manufacturing for safety-critical assets

Draft for consultation

October 2016  
Lloyd's Register Foundation Report Series PR1607 2016.1 (2/16) 1 (2016)

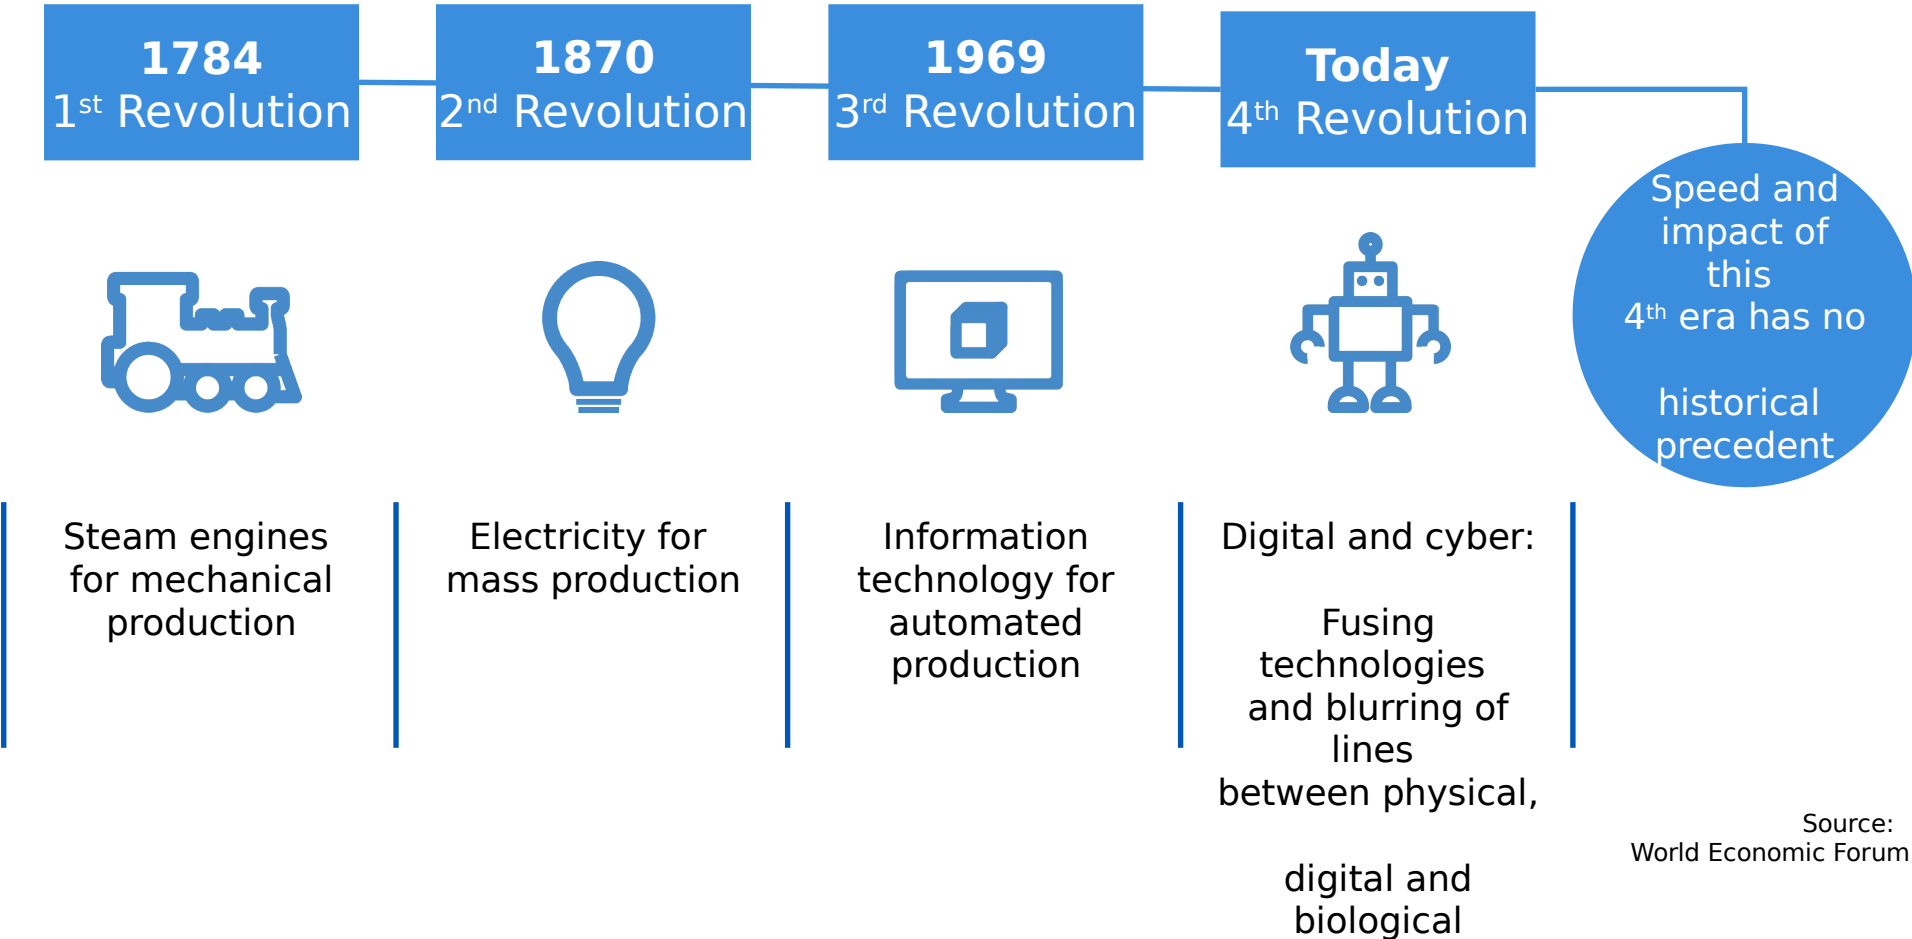

---

# Inspection Innovation

# The changing world around us

Source: World Economic Forum

# Industry 4.0 technology

## Smart solutions shaped with human intellig

- Additive Manufacturing
- Blockchain
- IoT - sensor technology
- VR/AR
- AI - Machine Learning
- Digitalization / data analytics
- Robotics
- Digital Twins

# Remote Presence Technology

## Collect

Image data capture.  
Cameras, Lidar,  
drones, mobile  
devices.  
Capturing data from  
any asset

## Store

Platform & data lake.  
Data storage &  
management,  
secure, consistent  
format, scalable,  
searchable &  
accessibility

## Analyse

Apply data science  
and machine  
learning  
algorithms for  
defect recognition  
and change  
detection

## Report

Digital Visual Asset  
Management, to  
interpret asset  
condition, inform  
decision making,  
optimise  
maintenance and  
inspection planning

# Remote Visual Inspection Technology

## Hardware

## Software

# Remote Inspections

---

## 4 D Criteria - Applications

- Dull,
  - Checklist, walk arounds, witnessing, night
- Dirty,
  - Sewer, chemicals,
- Distant,
  - Offshore, remote, lock downs,
- Dangerous
  - Height, subsurface, confined space,

# Remote Inspections

## Typical application Industry

- Manufacturing
  - Lab/test witnessing, welding
- In-Service Downstream
  - Flarestack, Pressure vessels, pipelines
- Energy
  - Turbine blades, electrical
- Civil / ports
  - Bridges, cranes,

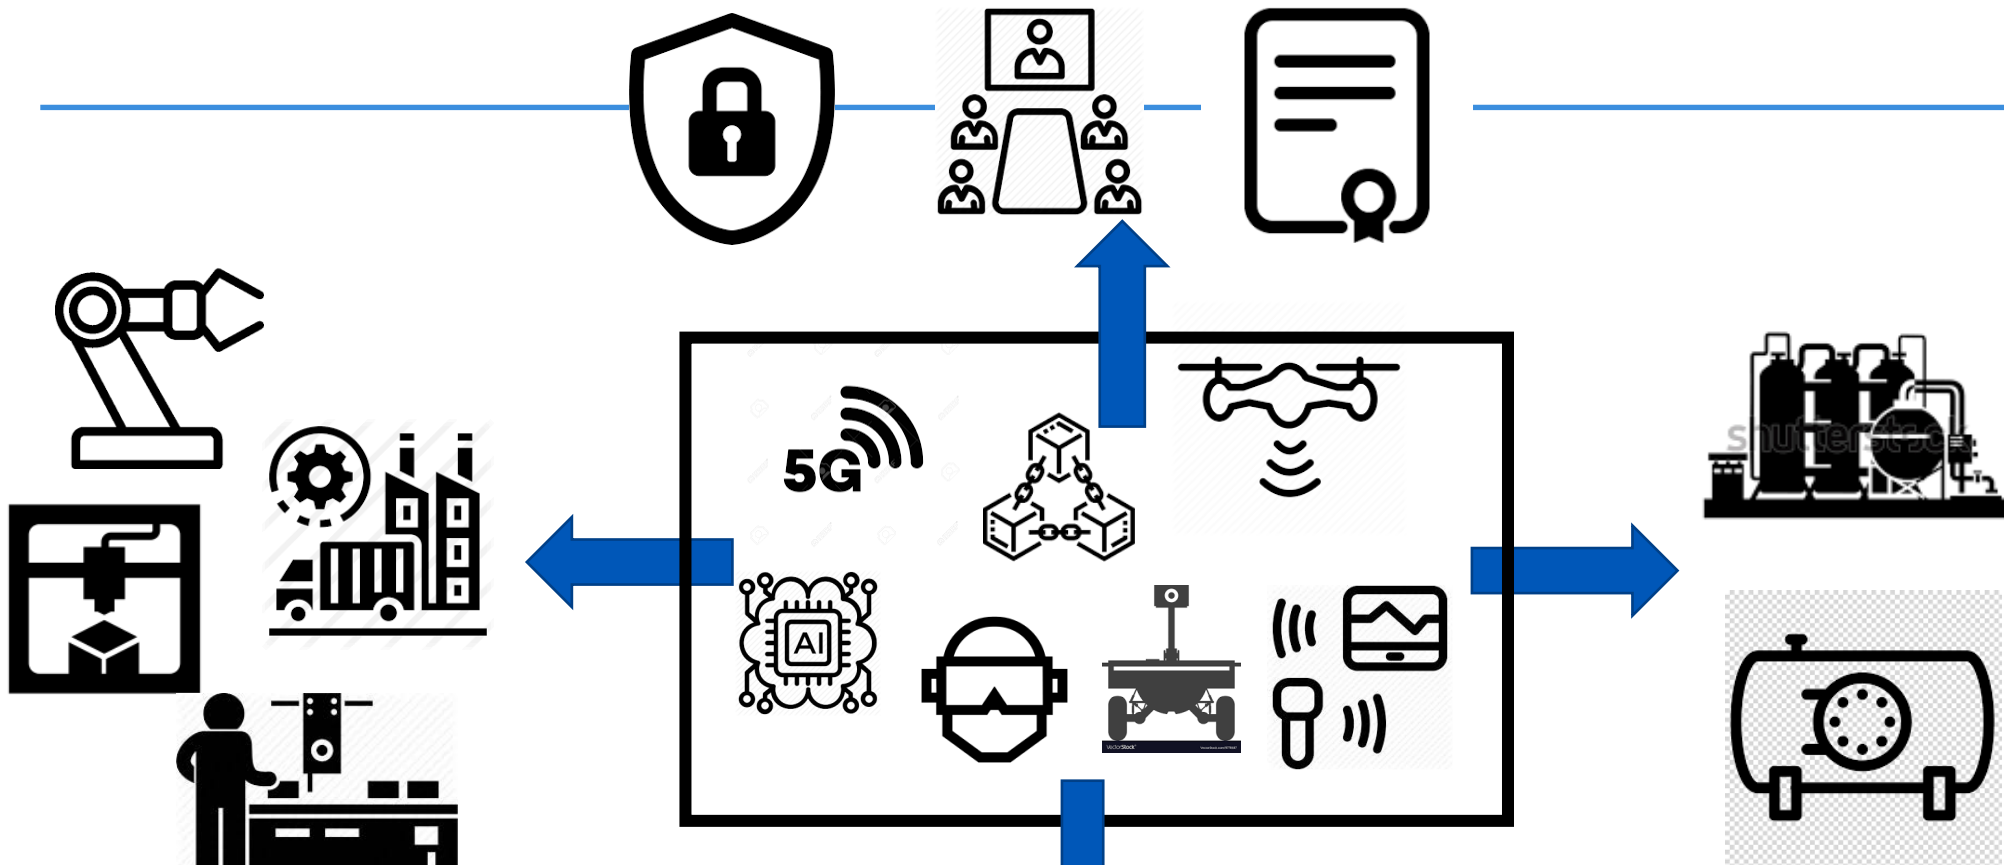

# Remote (robotic) Inspections

---

## Limitations

- Bandwidth (wifi / 4G)
- Resolutions of camera's
- Acceptance within codes/standards & Regulations (Procedures)
- Data security
- Experience

Digital and cyber:  
Fusing technologies  
and blurring of lines  
between physical,  
digital and biological

# Thank you
